## SolarBee® SB vs. GridBee® GF

*Two great choices for energy efficient mixing!*

The SolarBee® Solar Powered SB Series and the GridBee® Grid Powered GF Series both take advantage of the way water forms thin horizontal layers in all reservoirs, each machine can be set to a desired depth and can pull in water from all corners of the basin 24 hours a day using minimal power.

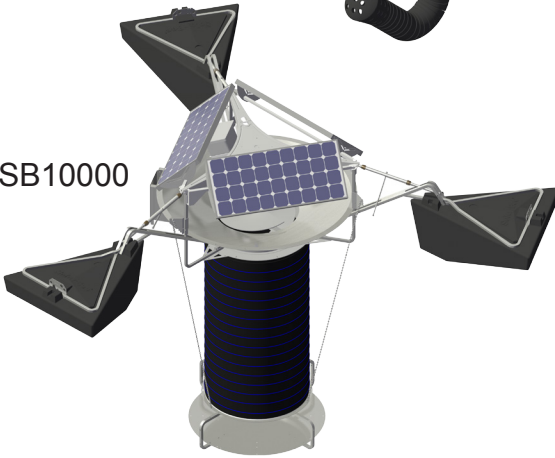

SB2500 / SB5000

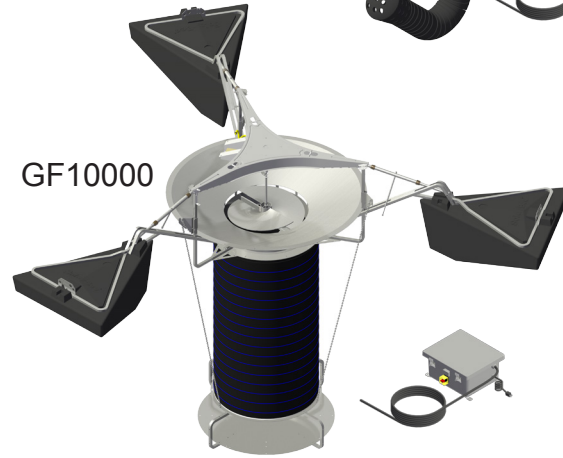

GF2500 / GF5000

SB10000

GF10000

### SB Series Mixers:

- **Solar Powered**
- Battery on board for night operation
- Energy efficient Long Distance Mixing
- Can displace 30-50hp of typical aeration mixing hp
- 25 year life motor with a 10 year warranty
- Various models / intake designs available
- Designed to be anchored or tethered
- Used in lakes, wastewater / stormwater ponds
- NSF Models used in Potable Water Tanks

### GF Series Mixers:

- **Electric Powered 120VAC / 60 Hz / 1 Phase**
- Uses low energy (<100 watts)
- Energy efficient Long Distance Mixing
- Can displace 30-50hp of typical aeration mixing hp
- 25 year life motor with a 10 year warranty
- Various models / intake designs available
- Designed to be tethered
- Used in lakes, wastewater / stormwater ponds
- NSF Models used in potable water tanks
