

Medora Corporation

NSF, UL, and CSA Certification

NSF/ANSI 61 and NSF/ANSI 372 (formerly know as Annex G for lead-free content) are standards developed by the NSF International (NSF) and the American National Standards Institute (ANSI). State regulators require all drinking water components conform to these standards but do not designate specific certifying organizations.

Certifying organizations in the United States & Canada include NSF, Underwriters Laboratories (UL), and Canadian Standards Association (CSA), among others. All GridBee SolarBee potable equipment have been certified to NSF/ANSI 61 & NSF/ANSI 372 standards.

Submersible motors are certified under UL. Remaining equipment components are certified under NSF. Please reference the links below for certification documentation for specific equipment and components.
