Technology Description- GridBee ${ }^{\circledR}$ air powered circulation equipment are made of corrosion resistant, 316 stainless steel with a durable clog-free design and no moving parts for low maintenance. The AP500 provides mixing in wet wells, lift stations, industrial tanks, open basins and ponds.

Materials of Construction - T316 stainless steel frame and hardware. EPDM and PVC air hose and polypropylene air hose fittings.
$50 \mathrm{ft}(15.24 \mathrm{~m}) \mathrm{T} 316$ stainless steel retrieval chain included for machine anchoring.
The AP500 will fit through a 13" diameter opening.
Minimum Water Depth - Machine requires 18 inches (.46M) of water to effectively circulate. No damage to machine when run dry in shallow water or drained condition.
Maximum Water Depth - Powered by a air pump with a maximum diffuser submergence depth of 10 ft (3M) Maximum air discharge depth is limited by the air supply pressure available.

Intake - The submergence depth on a pedestal unit is simply set by either the floor it rests on or for a suspended unit by the vertical suspending cable or chain.

AU-200-1/2 HP (375 watt) rated air pump unit capable of producing 6.0 standard cubic feet per minute ( 0.14 standard cubic meters per minute) @ 4 psi (17 kiloPascal). 100\% duty-cycle. Connection: Stem for 3/4" I.D. hose. Weather resistant construction, suitable for outdoor use. Ensure unit receives proper shade and ventilation to reduce chance of overheating.
Electrical Requirements - 120VAC Air pump requires $120 \mathrm{VAC} / 1 \mathrm{PH}$ power source outlet (minimum 20 Amp service), Current range: 3.8 amps (open discharge) - 2.2 (dead head).

## Shipping Size/Weight

- AU-200-13" x 9" x 11", 26 lbs .
- AP500-14" x 14" x 24 ", 35lbs.
- 50 ft Air Hose - $22^{\prime \prime} \times 22^{\prime \prime} \times 4$ ", 18 lbs .

Maintenance / Warranty- Limited maintenance. Limited manufacture's warranty. See Warranty Statement for details.
